## Industrial Lighting Range

Forklifts often operate in high-traffic areas where audible warning sirens and alarms provide little to no impact in busy surroundings.

To combat this problem, RCT has designed a range of Industrial Lighting to make a visual impact. These state-of-the-art lights, project an exclusion mark onto warehouse floors to visually alert personnel that a forklift is in the vicinity.

The Industrial Lighting range deliver high-intensity indicators for long-range visibility; creating maximum impact in any indoor applications.
